Art Unit: 3753

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on September 26, 2005, Mr. Neff requested an extension of time for 2 MONTH(S) and authorized the Director to charge Deposit Account No. 50-0540 the required fee of \$225.00 (small entity) for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the claims:

Claim 23 (currently amended)

A heat exchanger comprising in combination,

a plurality of panels of thermoplastic material having dispersed air-filled cavities, each of said panels having two opposed broad surfaces and at least one edge, each of said broad surfaces having a greater surface area than said edge,

Art Unit: 3753

selected ones of said panels having at least one indentation in at least one of said broad surfaces, said indentation forming a gas flow passage cavity,

others of said panels each having at least one gas flow conduit structure forming at least one gas flow conduit,

said selected ones of said panels being interleaved with said others of said panels in a predetermined sequence,

said panels being assembled with said broad surfaces of said panels joined together so that said gas flow passage cavity in each of said selected panels forms a gas flow passageway with one of said broad surfaces of an adjoining one of said other panels,

said gas flow passageways in said selected panels and said gas flow conduits in said other panels are positioned to conduct gases in substantially opposite directions over a substantial portion of their lengths,

said heat exchanger having a housing with at least one solid integral side wall formed by said edges of said panels being aligned with one another and fused together over a substantial portion of their lengths.

Claims 25 and 31 have been cancelled.

The following is an examiner's statement of reasons for allowance:

By Examiner's amendment, a recitation has been added as a new penultimate paragraph that states that the gas flow passageways in said selected

Art Unit: 3753

panels and said gas flow conduits in said other panels are positioned to conduct gases in substantially opposite directions over a substantial portion of their lengths (unlike all of the prior art applied in the final office action, except EP 0044561). The claim as amended above is deemed to define over the art (including EP '561 in combination with Hartig), because Hartig doesn't fairly teach forming a housing with at least one integral side wall formed by fusing the edges of the panels over a substantial portion of their lengths in a heat exchanger such as shown in Figure 10 of EP '561.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
